Salt Lake City, Utah
Room – Posted at the Hotel

Registration: No registration fee

Parking: Parking fees will be the responsibility of the training participant

RSVP: Becky King at rbarnett@utah.gov or (801) 538-4278

“Screening, Brief Intervention and Referral to Treatment is a comprehensive and integrated approach to the delivery of early intervention and treatment services through universal screening for persons with substance use disorders and those at risk” (SAMHSA 2010).

SBIRT is an evidenced based model which has been proven effective in reducing and preventing alcohol and drug use. Some of the benefits of SBIRT include:

- **Reduced health care costs (savings of \$3.81 for every \$1.00 spent on screening and intervention)**
 - **Helping patients decrease their risk of becoming alcohol and drug dependent**
-

Upon completion of this workshop, participants will learn:

- 1. The history of SBIRT**
- 2. The core components of SBIRT**
- 3. How to administer and score screening tools**
- 4. How to train peers on SBIRT**

CME’s and CEU’s will be provided...
